The Global economy performed reasonably well in 2024 supported by fiscal spend, declining inflation and the start of monetary easing with central banks cutting interest rates albeit at slower rates than anticipated last year. In the December 2024 quarter we saw a number of political events including the Trump victory with a dramatic economic agenda including massive tariff hikes, the ousting of the French and German governments due to inability to agree on budget restraints and deceleration of Chinese economic growth. These have caused a dramatic strengthening of the US \$, a rise in both short and long term interest rates, resulting in greater economic uncertainty in the short term. We anticipate that economic forecasts will be scaled back for the next 2 years.

In the long run the global economy could be boosted by continued fiscal spending, lower interest rates and the positive effects of technological change like robotics and artificial intelligence. The risk to the Global economy continue to rise, these include ageing world population, very high public and private sector debt, rising populism affecting budget spends, trade and hot wars.

The global property sector had a strong recovery for the first 9 months of 2024, but reversed some of these gains in last 3 months following the rise in bond yields. The Oasis Crescent Global Property Fund has continued to perform well benefitting from a portfolio of high quality Reits, with positive demand / supply fundamentals in secular growth sectors, with superior balance sheets and excellent management. OCGPEF is well positioned to add value over the long term.
