Fund Manager Comments

The global economy has slowed marginally but has remained resilient. Inflation is declining to target ranges, despite relatively high services and wage inflation, while goods inflation is below trendline as supply chains are being restored. The interest rate cutting cycle is in full swing, with the Fed cutting 50bps and the EU implementing its second 25bps cut. The looser monetary policy, supported by robust fiscal spend, will support the global economy. Populism, geopolitics, trade wars and high debt levels, together with the downward adjustment in the Chinese economy, remain significant risks to the global economy and financial markets. Gold, the ultimate risk diversifier and store of value continue to reach new all-time highs while the US Dollar has started weakening from its peak levels.

With robust income markets, supported by declining yields and looser monetary policy and strong fundamentals, our income funds have performed well.
