Objectives and Investment Policy

Objective:

The objective of the Fund is to achieve real growth of capital and income for investors (net of fees) over rolling ten year periods in excess of the Consumer Price Index ("CPI") rate of the OECD countries.

Investment Policy:

- The Fund is actively managed in accordance with Shari'ah principles.
- The Fund is a multi-asset fund which aims to achieve its Investment Objective by investing globally in equity securities, fixed income securities, debt securities, indirect exposure to property, indirect exposure to commodities and cash or cash equivalents. Investment in debt securities includes fixed and/or floating rate instruments including, but not limited to commercial paper, floating rate notes, certificates of deposits, freely transferable promissory notes and bonds (government and/or corporate). The Fund will have a bias towards non-equity securities and a low to moderate exposure to equity securities and real estate investment trusts ("REITS"). The Fund's equity exposure will not exceed 45% of its net asset value.
- The Fund may obtain exposure to these investments directly or indirectly, and the Fund may be invested up to 100% in other collective investment schemes.
- Where investment is made in property, such investments will be in shares of companies or REITs which invest in property.
- Exposure to commodities will be achieved by investing in other collective investment schemes (including exchange traded funds) which have indirect exposure to commodities. The Fund will not invest in collective investment schemes which invest directly in commodities.
- The Fund is not restricted geographically.
- The Fund may only invest in derivatives for the purpose of efficient portfolio management.
- The collective investment schemes which the Fund may invest in may include other Funds of the Company or other collective investment schemes managed by the ACD or the Investment Manager.
- The Fund may also hold investments in cash or cash equivalents which may comprise ancillary liquid assets (meaning cash, deposits or securities evidencing deposits issued by or guaranteed by an institution and money market funds).
- From time to time, where the Investment Manager considers it to be in the best interest of the Fund, the Fund may hold larger proportions of liquid assets.

- The Fund targets a return in excess of the Consumer Price Index ("CPI") rate of the OECD countries (OEOTGABM Index) (the "Benchmark"). The Fund is actively managed and the Investment Manager is not constrained by the Benchmark or any other benchmark in the selection of the investments for the Fund.
- The Fund's Benchmark has been chosen because it reflects an appropriate performance target, taking into account the risk profile of the Fund, compared to the Benchmark, which is a measure of inflation. Over time, inflation decreases the purchasing power of your investment. If the Fund's performance matched the Benchmark, your investment would have the same purchasing power as it had the previous year. This Fund seeks to outperform the Benchmark in order to provide real growth in the context of OECD countries.
- The Fund's Benchmark is available here: <https://data.oecd.org/price/inflation-cpi.htm>.

- The above risk number is based on historical data in relation to the rate at which the value of the Fund's proposed portfolio has moved up and down in the past.
- The above indicator is based on historical data and may not be a reliable indication of the risk profile of the Fund.
- The risk and reward category shown is not guaranteed and may shift over time.
- The lowest category does not mean 'risk free'. Investment is only made in highly rated income yielding securities, and exposure to credit risk is considered low.

The Fund may be exposed to risks which the risk number does not adequately capture. These may include:

- The value of stock market investments, and the income from them, will fluctuate. This will cause the Fund price to fall as well as rise and you may not get back the original amount you invested.
- Any investment in international companies means that currency exchange rate fluctuations will have an impact on the Fund.
- The Fund invests in a variety of geographic regions and countries concentrated in the real estate sector. It is therefore exposed to the market sentiment of those specific geographic regions and countries.

The general risk factors as appear under the heading "Risk Factors" in the Prospectus shall also apply.
