Fund Manager Comments

The global economic contraction in 2020 was the worst in 50 years driven by the COVID-19 related lockdowns. The 3.3% decline in the global economy was better than expected due to massive synchronised monetary and fiscal stimulus. 2021 is expected to deliver the strongest global growth in many decades, with the global economy forecast to grow by 6.0%. 2022 growth is forecast at 4.4%. Continued monetary and fiscal stimulus supported by an aggressive vaccine rollout in some countries will boost the economic recovery. Global growth will be led by those countries like China and the U.S. (the 1st and 2nd largest world economies, respectively), which have aggressive vaccine rollouts and South-East Asia with a lower incidence of COVID-19. Regions like Europe, Latin America and Africa, who are lagging with the vaccine rollout, will have less robust economic recoveries. Factors that could boost global growth further are: a) the massive build-up in consumer savings; b) the wealth effect of robust financial markets; and c) pent-up demand. Factors that could constrain global growth are: a) new variants of COVID-19 b) sustainably high inflation c) a reversal of monetary and fiscal support d) constrained global supply chains, especially in logistics and semiconductors and e) continued geopolitical tension between US and China. In conclusion, the global economy should have robust growth in 2021 and the risks mainly impact 2022 onwards.

Property has been affected by the COVID-19 lockdown but lower levels of capital investment and development activity is curtailing new supply and creates an improving environment for existing property owners over the medium to longer term. OCGPEF is well diversified with exposure to a number of sectors that benefit from the 4th Industrial Revolution and the Lockdown including Logistics, Datacenters, Storage and Medical Research. There are also a number of sectors that benefit from secular drivers including Ageing (Seniors Housing), Post COVID-19 reopening (Student Accommodation) and Onshoring (Industrial). OCGPEF is well positioned due to its focus on REITs with positive secular demand drivers, strong management teams and superior balance sheets. The Fund displays very attractive valuation characteristics with an average cash flow yield of 5.5% and dividend yield of 3.7% which offers a lot of value relative to the average bond yield of 1.8% and average inflation at 1.3%.
