The Global economic growth forecast has moved up slightly despite the negative impact of the West Asian and Ukraine wars, with advanced economies' growth nudging up and emerging economies' growth slowing with West Asian economies moving into recession. Many advanced economies are experiencing severe political unrest e.g. France and massive electoral wins for far-right wing parties e.g. Germany. The fiscal situation is deteriorating, despite high rates of taxation. With the huge fiscal deficits and high levels of debt, many advanced economies are unable to support their social welfare systems which are not designed for a rapidly ageing population. The populists are turning on immigrants, many of whom are educated, skilled and highly productive. Economic growth is at risk due to the impact of the Ukraine and Western Asian wars, high inflation, high interest rates and if investment spend on AI infrastructure slows. The cost of debt capital is likely to remain elevated due to 1) high supply of debt by Governments and Big Tech for their AI build, 2) high inflation and 3) the elevated geopolitical and country risks.

The Global economic risks remain high due to 1) elevated geopolitical tension, 2) energy and food supply chain disruption, 3) higher inflation and interest rates, 4) expanding government debt, 5) ageing populations in many countries, 6) the rise of "Made By China", 7) unstable governments, 8) slower economic growth and 9) unaffordable social welfare systems. Economies that are able to navigate through this period will prosper.

Country	20-Year Avg CPI	Current CPI	Difference	5 year Peak Central Bank Rates	Current Central Bank Rate	Difference	Current Real Rate	20 Year Avg Real Rate	Difference
USA	2.5	3.4	0.9	5.50	4.00	-1.50	0.60	-0.69	1.29
EU	2.1	3.2	1.1	4.50	2.65	-1.85	-0.55	-0.89	0.34
China	2.2	0.8	-1.4	3.85	3.00	-0.85	2.20	1.38	0.82

Global bond yields troughed during February 2026, followed by significant increases, reflecting expectations of higher inflation due to the wars in Western Asia and Ukraine and the impact on energy and food-related commodities. This is the driving force of changes in the interest rate cycle with Central Banks moving from cutting to a rising cycle. With the wars lasting longer, the impact on supply and prices are significant, Central Banks should remain cautious to deal with the second-round impact on inflation. If Central Banks are dovish, inflation could trend higher for longer creating a negative environment for bonds. The Government and Technology company supply of bonds is overwhelming demand, pushing Bond yields up further.

The US 10-year yield troughed at 3.9% during the year to date and ended September at 5.3%. Japan's 10-year yield troughed at 2.1% and increased to 3.0%, while the UK 10-year yield troughed at 4.2% and increased to 5.4%, raising the Cost of Debt Capital for both the Public and Private sectors.

The yield to maturity of the Oasis Crescent Global Income Fund (OCGIF) and the Oasis Crescent Global Short Term Income Fund (OCGSTIF), including reinvestment of income, is 5.60% and 3.64% respectively. Both funds are well positioned for this volatile environment, with geographic diversification and a focus on high-quality sovereigns, supranational agencies, state-owned enterprises, and well-regulated banks.
