Fund Manager Comments

The Global economy remains resilient despite the rise of populist and geopolitical tensions which are increasing the risk profile. The rise in barriers like visas, tariffs and sanctions are constraining the movement of goods, people and capital which is having a negative impact on global trade, growth and inflation. There has also been a rapid rise in government debt since the Covid pandemic, due to massive fiscal spend and more recently to support domestic production of semiconductors and other essential goods, together with the rise in defence spending. Inflation has declined in major economies driven by a rapid decline in goods inflation with service inflation remaining resilient due to the tight labour markets. More recently there are signs that the labour market is slowing with unemployment rising marginally. With real wages becoming positive and with central banks likely to cut interest rates, disposable income should rise.

Global Equities had a strong first half with the US, technology and in particular the so called Magnificent 7 driving most of the growth. We continue to believe that parts of the technology sector and in particular the AI and Semiconductor focused companies are overvalued with significant downside. We have increased our exposure to North American gold shares as a risk diversifier. Our portfolio remains very attractive relative to the global benchmarks due to its focus on great companies that have superior profitability (ROAE & ROIC), strong balance sheets (Debt / EBITDA), superior cash flows (Free Cash Flow) and are attractively priced based on PE, EV/EBITDA and Dividend Yield.
