Source: IMF World Economic Outlook

The IMF updated its forecast for economic growth in April 2025, with the Global economy expected to grow at a slower rate of 2.8% and 3.0% for 2025 and 2026 respectively, 0.5% and 0.3% lower than their January forecast. We would expect their July 25 forecast to be even lower, in the USA, the Fed is now forecasting 2025 growth at 1.4% which is 1.3% and 0.4% lower than the IMF January and April forecast respectively. The World Banks latest forecast for 2025 global growth is 2.3%, 1% lower than the IMF's forecast of 3.3% in January.

As indicated in the Quarter1 2025 Fund Facts, the USA administrations imposition of a new tariff regime, with a deadline of 7 July 2025, since moved to 1 August 2025, has significantly affected the Global trade and economic order. We would expect the impact to be material in the 3rd and 4th Quarter of 2025. The new Tariff regime, the removal of incentives for electric vehicles and renewable energy and a rising dependency ratio, will result in a bipolar world, One (US and those countries who adopt a similar tariff regime) faced with higher inflationary expectations, shortages and higher cost of capital and the rest of the world with declining inflation expectations, surplus capacity and declining cost of capital. This will increase the risks to the Global Economy. Central Banks in the USA, China and Emerging Economies have scope to lower interest rates to support their economies. Europe has substantially completed its interest rate easing cycle.

With most countries having very high Fiscal deficits, high and rising debt, ageing populations, increasing interest costs and defense spending are putting budgets under further pressure, with higher deficits or crowding out other expenditure like social security and healthcare. The USA "Big Beautiful Bill " is expected to add \$3-5T to their fiscal debt over 10 years. Outside the USA most countries will try and support their economies and businesses with fiscal support, thereby increasing their national debt levels and deficits. In the last major economic and financial market dislocations, the global financial crisis (2008) and Covid-pandemic (2020), economies were supported by massive Fiscal and Monetary stimulus (including lower interest rates and quantitative easing). This time round, with government balance sheets constrained, and tariffs fueling inflation risk it is unlikely that Fiscal and Monetary policies will provide major support to the Global economy and financial markets. The next while requires steady heads and Statesman to see, us through this period of extreme uncertainty.

The global property sector was boosted by a very robust European Reit sector, with performance boosted by low valuations (after 10 years of underperformance), lower European interest rates and strong currencies in the Euro and Pound. The Oasis Crescent Global Property Fund (OCGPEF), £ class, was awarded the prestigious LSEG Lipper award for the best performing fund over a 3-year period. The fund had \$ returns of 10.7% for the year ending June 2025. OCGPEF has a portfolio of high-quality Reits, with positive demand / supply fundamentals in secular growth sectors, with superior balance sheets with excellent management. The fund is well positioned with 11% cash/near cash holding to add value over the long term.

Disclaimer :

UK Undertakings for Collective Investments in Transferable Securities (UCITS) are generally medium to long term investments.Past performance is not indicative of future returns.

Warning: The value of your investment may go down as well as up and past performance is not a reliable guide to future performance.

Deductions for charges and expenses are not made uniformly throughout the life of the product, but are loaded disproportionately onto the early period.

A schedule of fees and charges is available from Oasis Crescent Wealth (UK) Ltd. ("the Authorised Corporate Director" or "ACD") on request. Portfolios are valued at 08h00 daily using the previous day's prices as at 22h00 GMT. All necessary documentation must be received before 14h00. Investments are made globally across a number of countries and currencies.

Warning:This product may be affected by changes in currency exchange rates.

Prices are calculated on a net asset value basis which is the total value of all assets in the Oasis Crescent Global Property Equity Fund, a "Sub-Fund" of Oasis Crescent Global Investment Funds (UK) ICVC (the "Fund"), Registration Number : IC030383, including any income accruals and less any permissible deductions from the Sub-Fund which may include but not be limited to auditors fees, bank charges, custodian fees, management fees and investment advisory fees. UCITS can engage in borrowing and scrip lending and may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity.

Warning: The income that an investor may get from an investment may go down as well as up.

The ACD is authorised and regulated by the Financial Conduct Authority. The Fund and the Sub-Fund are regulated by the Financial Conduct Authority and is managed by the ACD in accordance with the UK UCITS Regulations. Performance figures quoted are from Oasis Research and Bloomberg for the period ending 30 June 2025 for lump sum investment, using NAV-NAV prices with income distributions reinvested. Returns may vary depending on the actual date of investment and the actual date of reinvestment of income. The Key Investor Information Documents or a full Prospectus are available on request from the ACD and Oasis Crescent Management Company Ltd. The Sub-Fund is registered with the Financial Sector Conduct Authority for distribution in South Africa, the Swiss Financial Markets Supervisory Authority for distribution in Switzerland, the Monetary Authority of Singapore for distribution in Singapore and the Securities and Commodities Authority of the United Arab Emirates for distribution in the UAE. The Sub-Fund has a Total Expense Ratio (TER) of 2.12%, which is the average Net Asset Value of the portfolio incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The ratio does not include transaction costs. The current TER cannot be regarded as an indication of future TERs. Full details and basis of accolades received are available from the ACD and Oasis Crescent Management Company Ltd. All information and opinions provided are of a general nature and the document contains no express or implied recommendation, warranty, guidance, advice or proposal that the Sub-Fund is appropriate to the investment objectives, financial situation or needs of any individual or entity. All data and information (unless otherwise stated) is as at 30 June 2025.
