Fund Manager Comments

Global economic growth has remained resilient over recent years despite the impact of lower global trade, lower productivity, higher interest rates and the cost of living crises. A driver of this resilience has been the services activity which has outperformed manufacturing. Looking ahead we are expecting the combination of lower inflation and interest rates over the next 24 months and the cost of living crises subsiding to support stronger economic growth. Productivity is also expected to improve but the geo political pressure will continue to constrain global trade. Inflation is peaking globally and as interest rates decline and economic growth improves we expect asset, equity and property values to increase. Factors that could boost global growth are: 1) Start of global interest rate cut cycle; 2) Lower energy prices; 3) Renewed fiscal policy support for infrastructure development and reindustrialisation 4) Cessation of war in the Middle East and Ukraine; and 5) Technology led improvement in productivity. Factors that could constrain global growth are: 1) Escalation of war in the Middle East and Ukraine 2) Renewed cost push inflation (eg. higher global oil prices) 3) Disorderly unwind of Chinese property market; 4) Significant unwinding of housing markets; and 5) Disruption from technology on labour markets, especially AI.

We have seen yields moving up significantly and we are starting to see real global rates which are attractive. This is creating opportunities to invest in attractive yields at longer duration and we actively manage our duration over the cycle in order to maximise returns for our income portfolios. We remain focused on investing in high quality issuers with strong and sustainable cash flows.
